The Tutorial-to-Checklist Prompt

1 AI A Day · Day 49

JJ Wong · jjwong.ai

Turn any long tutorial into a one-page checklist — with every number marked for checking.

The idea

You need the steps, not the video. Turn each tutorial into a checklist once, and keep it.

The prompt

> Here's a tutorial transcript.
> Turn it into a numbered checklist I can follow while doing the task.
> Steps only, in order, one action per line.
> Mark every number, price, setting name or menu path with [CHECK].
> If a step is unclear in the transcript, write "unclear" instead of guessing.

The [CHECK] rule

Every line marked [CHECK] gets verified against the video before you use the checklist. Those are the lines AI most often gets slightly wrong.

Checklist template

Task: Source video: (link + date) **Last checked:**

#	STEP	[CHECK]?	DONE
1			
2			
3			

The trap

Summaries skip steps. The one AI drops is often the small step that breaks everything.
